

2-DAY WEBINAR

What's New in Cerebral Palsy

June 25-26, 2021 | 10am – 3pm each day

Presented by
Ginny Paleg, PT, MPT, DScPT

Friday, June 25, 2021

10:00 am – 12:00 pm PT

Session 1 - Early Detection and Early Intervention (Focus on Children at GMFCS Levels IV & V)

12:00 – 1:00 pm PT

Lunch

1:00 – 3:00 pm PT

Session 2 - Hypotonia

Saturday, June 26, 2021

10:00 am – 12:00 pm PT

Session 3 – What's New in Standing Programs?

12:00 – 1:00 pm PT

Lunch

1:00 – 3:00 pm PT

Session 4 - Gait Trainers, Support Walkers, and a Dynamic Mobility Device

Registration Information

Course Registration Fees

APTA Oregon PT/PTA Members:	\$40
APTA Oregon Student Members:	FREE
Non-Members:	\$60
Non-Member Students:	\$10

* Member category eligibility includes any APTA member whether in Oregon or any other state. (APTA member number is required.)

This course qualifies for 8 hours of CE

Course Description

This course will contain four two-hour segments: Early Detection and Intervention of CP, Hypotonia, Standers, and Assisted Stepping. All content will focus on the newest evidence-based practice patterns for children who are non-ambulatory (GMFCS IV and V). We will start by reviewing the International Guidelines for Early Detection and Intervention. We will look at the F-Words and the evidence behind the shift from disability to enablement. During the second session we will look at the AACPDH Hypotonia Care pathway and review all the evidence-based intervention for Hypotonia using a case story approach. The third session will be an update on the evidence for standing programs with a focus on abduction and weight-bearing. The last segment will be about supported stepping and its affect on muscle and bone health across the lifespans as well as its impact on and participation. We will look at the evidence for gait trainers, support walkers and dynamic mobility devices as well as the options available and how to match those with the individual student's needs.

Objectives

1. Participants will be able to describe the GMA and HINE tools.
2. Participants will be able to list their evidence-based interventions for children with hypotonia.
3. Participants will be able to design a standing program to address a specific ICF based goal.
4. Participants will be able to describe the differences between a gait trainer, support walker and dynamic mobility device.

Presenter

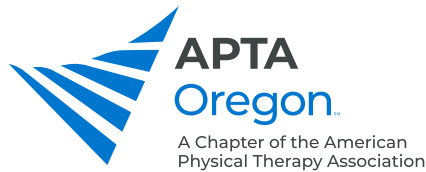

Ginny Paleg, PT, MPT, DScPT

Ginny Paleg is a pediatric physiotherapist from Silver Spring, Maryland, USA. For the past 17 years, she has worked with children aged 0-3 years in homes and childcare. Ginny earned her master's degree in physical therapy at Emory University and her DScPT at the University of Maryland Baltimore. Ginny specializes in posture and mobility assessment and interventions for children at GMFCS Levels IV and V. She is certified in Prechtl General Movement Assessment (GMA) and the Hammersmith Infant Neurological Exam (HINE) and trained in Routines Based Interventions (McMaster) and coaching (Sheldon and Rush). She

has published over 15 peer-reviewed journal articles on standing, gait trainers, and power mobility. She is the lead author for the American Academy of Cerebral Palsy Hypotonia Care Pathway. She is the Incoming Chair of the AACPDH Communications Committee (2021-2023). Her latest publications are a case study on a child with "treated type 1 SMA" and a study on weight bearing in various positions in 3 models of standers.
